PROFESSIONAL SUMMARY

Third-year BSc (Hons) Information Technology undergraduate at SLIIT specializing in Data Science, with a current CGPA of 3.65 and Academic Dean's List recognition. Practical experience across full-stack web development, mobile applications, and machine learning projects, with skills in developing secure REST APIs, data-driven systems, interactive dashboards, and AI-supported applications using Java, Python, JavaScript, React, Node.js, Spring Boot, MongoDB, MySQL, and machine learning technologies. Currently seeking a Data Science, AI/ML, or Software Engineering internship to apply technical knowledge to real-world solutions and contribute effectively within a collaborative engineering team.

PROJECT EXPERIENCE

Fitness Tracking Mobile Application

April 2026 - May 2026

React Native (Expo) | Node.js | Express.js | MongoDB | REST APIs | JWT

- Developed a full-stack mobile fitness tracking application that helps users manage workouts, exercises, fitness goals, meal plans, weekly challenges, and progress records.
- Implemented secure authentication and protected API access using JWT, bcrypt password hashing, and role-based backend middleware for reliable user session management.
- Built and integrated RESTful APIs with MongoDB/Mongoose for core modules including User Profiles, Workouts, Exercises, Goals, Meal Plans, Challenges, and Progress Analytics.
- Designed mobile screens with React Native and Expo, including dashboard views, progress tracking, workout management, and analytics charts for a smooth user experience.

AI-Driven Loan Risk Assessment & Recommendation System

January 2026 - May 2026

React | FastAPI | MongoDB | Python | XGBoost | SHAP

- Developed a secure AI-driven microfinance loan platform to predict applicant default risk and support data-driven loan approval decisions
- Built and integrated an XGBoost-based risk prediction model using feature engineering, SMOTE, and SHAP explanations for transparent risk assessment
- Implemented role-based access, loan application workflows, recommendation logic, repayment tracking, and analytics dashboards for staff users

DengueRisk - AI-Based Dengue Risk Prediction System

August 2025 - October 2025

Python | Pandas | NumPy | Scikit-learn | Matplotlib | Data Visualization

- Trained a Scikit-learn classification model to predict dengue risk levels across 25 Sri Lankan districts using weekly case counts and weather data.
- Performed data preprocessing, missing-value handling, and feature engineering on multi-source datasets to improve model accuracy.
- Created visualizations of dengue trends, seasonal patterns, and risk heatmaps to support early outbreak detection and public health analysis.

Secure Web-Based E-Voting System for Campus Awards

July 2025 - October 2025

Java | React | Vite | H2 Database | MS SQL Server

- Built a secure web-based e-voting platform enforcing one-vote-per-user-per-category for campus award nominations, with full input validation and session management.
- Developed admin-controlled event management and nomination management features with real-time result dashboards.

- Created transparent result-viewing interfaces enabling administrators and voters to track outcomes during and after voting periods.

Real Estate Property Listings Portal

March 2025 - May 2025

Java | JavaScript | HTML | CSS | Smart Tomcat

- Developed a web-based application for managing and displaying property listings.
- Applied object-oriented programming concepts to structure system design.
- Implemented property management features with a user-friendly interface.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript

Frontend Development: React, React Native, Expo, Vite, HTML, CSS

Backend & Frameworks: Node.js, Express.js, REST APIs, JWT Authentication

Databases & Data Management: MongoDB, MySQL, MS SQL Server

Machine Learning & Data Science: XGBoost, Scikit-learn, Pandas, NumPy, Data Visualization, TensorFlow

Core Concepts: Object-Oriented Programming, RESTful Architecture, Agile Methodology, Database Design, Authentication & Authorization

Tools & Technologies: Git, GitHub, Postman, IntelliJ IDEA, VS Code, Mongoose, Google Colab

SOFT SKILLS

• Problem Solving • Analytical Thinking • Teamwork & Collaboration • Time Management • Adaptability • Continuous Learning

EDUCATION

- Undergraduate – BSc (Hons) Information Technology (Data Science)
Sri Lanka Institute of Information Technology (SLIIT)
Expected Graduation: 2028
- G.C.E Advanced Level (A/L) – Physical Science Stream
Panadura Balika Maha Vidyalaya
2020 – 2023
- G.C.E Ordinary Level (O/L)
Panadura Balika Maha Vidyalaya
2018 – 2019

EXTRA CURRICULAR ACTIVITIES

- A Student Member of the Institute of Electrical and Electronics Engineers (IEEE) (2026 - Present)
